

Export from Genesis 2000

How to export a Fannie Mae format 3.0 file

Answer:

1. Click on the "DO Info & Services" link underneath the section of Fannie Mae.
2. On the upcoming page, on the left hand side under the section "Get Business Done", click on the link "Export Loan Fannie Mae Format".
3. At the Export Fannie Mae Format screen you may select the Borrower you want to export.

NOTE: "Path to Export Files" is where the file is going to be exported to. You

may change the path by clicking on the "Browse" button. The exported file's

name will by default be set to that of the internal file number. If you wish to use a different name, check the box "Ask for File Names", which will enable renaming of the file.
